

Test execution reports.

INTRODUCTION

This test summary report details the testing activities conducted for the Qafox Web Application during the period from August 27-08-24, to August 30-08-24.

The objectives of this report are:

- To provide an overview of the test case execution status.
- To provide an overview of the bug report status.
- To present a summary of the defects identified and their current status.
- To offer suggestions for the next phase of testing.

TEST CASE EXECUTION STATUS

The table below summarizes the status of all test cases executed for the Amazon India Web Application during the testing period:

<u>Test Case Status</u>	<u>Result</u>
Total Number of Test Cases	100
Passed Test Cases	09
Failed Test Cases	91

DEFECT STATUS

The following table highlights the defects identified, categorized by their priority level:

<u>Defect Priority</u>	<u>Count</u>
Critical	03
Major	05
Minor	02

Total Defects	10

RECOMMENDATIONS FOR NEXT TESTING PERIOD

Addressing Defects: Immediate attention should be given to resolving the identified blocker defect.

Retesting: Ensure failed test cases are retested after the defects have been resolved, with particular focus on functionality and performance.

Further Testing: Expand the scope of testing to cover more edge cases and to assess performance under varying user loads.
